PRIVATE MORTGAGE INSURANCE:  
Promoting Homeownership for Tennessee Families

Private mortgage insurance (private MI) is typically required by mortgage lenders to approve homebuyers who have down payments less than 20% of the purchase price. For nearly 65 years, private MI has been an important component in the U.S. housing finance system, helping creditworthy borrowers in Tennessee and across the country to access home financing while protecting lenders and taxpayers.

By design private MI is a proven, reliable method in shielding the government-sponsored enterprises (GSEs), Fannie Mae and Freddie Mac, as well as American taxpayers, from losses on mortgage credit risk. Private MI companies paid nearly $60 billion in claims since the 2008 financial crisis and housing market downturn, claims the government and taxpayers did not have to provide.

Down Payment is the #1 Impediment to Homeownership

That typical 20% threshold is out of reach for many families. For example, it could take 21 years for a household earning the national median income of $68,703 to save 20%, plus closing costs, for a $299,900 home (national median sales price).

In Tennessee, the median income is $56,627 and the median sales prices for a single-family home is $290,500. Using this same analysis, it would take 25 years for a state resident to save 20%, plus closing costs (3% of the total sales price on average).

PRIVATE MI HELPS BORROWERS AFFORD A HOME SOONER

Private MI not only helps borrowers overcome the biggest hurdle to homeownership but acts as a second set of eyes with independent credit underwriting standards. It aligns the interests of borrowers, lenders and investors.

$66,815  
(25 years to save)  
20% Down Payment without private MI, plus closing costs  
(U.S. $68,977)

$23,240  
(9 years to save)  
5% Down Payment with private MI, plus closing costs  
(U.S. $23,992)

**Private MI Helps Borrowers Bridge the Down Payment Gap**

By helping borrowers qualify for a mortgage with a down payment as low as 3%, private MI has given more than 35 million families nationally the opportunity to purchase a home sooner for nearly 65 years.\(^{18}\)

---

**Private MI Protects Taxpayers**

Private MI is a first level of credit protection against the risk of loss on a mortgage in the event a borrower is not able to repay the loan and there is not sufficient equity in the home to cover the amount owed. With the GSEs in conservatorship and the government effectively guaranteeing the GSEs, taxpayers face direct exposure to mortgage credit losses experienced by the GSEs. Traditionally, for loans with down payments under 20% of the home value, private MI – not taxpayers – covers the first losses if there is a default, up to certain coverage limits.

</tr>
</tbody>
</table>

**Private MI is Temporary**

Unlike FHA and other government mortgage insurance, which typically cannot be cancelled, private MI paid for by the borrower can be cancelled, leading to potential savings over the life of their loan. Private MI can be cancelled in two ways: \(^{22}\)

- A borrower may request cancellation of private MI when he/she has established 20% equity in the home. In other words, the borrower has paid down the mortgage balance to 80% of the home’s original or newly appraised price.
- When the principal balance of the mortgage is scheduled to reach 78% of the home’s original value and the borrower is current on payments, the servicer terminates private MI.
